1 Introduction

1.1 Outline

Projector Image Tool (PJImg) provides the ability to create a proprietary formatted MyImage file from any standard image file or typing the text. The PJImg will help to create MyImage file and send the file over the network for testing or verification purpose.

PJImg provides the ability to:

- **x** Create MyImage file from any standard image file (jpeg, bitmap, gif and etc)
- *x* Create Text message on plain background or add on the image
- X Send the MyImage file to a projector

After verification of MyImage file, you can deploy the MyImage file(s) using Projector Management Tool (PJMan).

[Note]

In order to send the MyImage to the projector, the computer needs to connect the network and be able to communicate with the projector. Please see 'User's Manual-Network Functions' for the details.

Please see 'User's Manual-Operating Guide' and 'User's Manual-Network Functions' about MyImage functionality.

1.2 System

The following diagram shows a typical network diagram for the Projector Image Tool.

Projectors

> Use a UTP cable category 5 or higher for a Local Area Network cable.

2 Installation

2.1 System Requirements

The following are the minimum system requirements of hardware and software to use the Projector Image Tool.

(1) Operating System

Windows 7

Windows 8

Windows 8.1

Windows 10

(2) CPU

Pentium3 500MHz or higher

(3) Memory

128MB or higher

(4) Hard Disc

Minimum 20MB free space for installation.

(5) Local Area Network port (RJ-45)

CHkiSTIE[®]

2.2 Projector Image Tool Installation

The installation process of Projector Image Tool is shown below. Please follow each step.

- (1) Double click the file "InstForPJImg_v3.20a.exe".
- (2) Select the language (English, Japanese or Chinese [Simplified]) during the installation process. And then click [OK].
- (3) Click [Next]

(4) Read "Software License Agreement" and select "I accept the agreement" and click [Next] if you agree the license agreement. Otherwise, click [Cancel] and stop the installation.

(5) Confirm the install folder, and then click [Next].

3 Operating Instructions

3.1 Create login accounts

The Projector Image Tool requires a login name and password to launch the software. The Projector User Administration Tool helps you to create new user accounts.

3.1.1 How to launch

Double Click "PJUsrEdit.exe" that is located on same folder that you installed Projector Image Tool.

It automatically launches the Projector User Administration Tool, if no user accounts are created yet. Also Projector Image Tool has a short cut [File] \rightarrow [User Configuration] to launch Projector User Administration Tool.

3.8 Optimize & Create PJ1 or JPG File

The MyImage file is required propriety formatted file and limited size. The Optimize function will help you to create MyImage file with appropriate file format and size.

- > There are some models which do not correspond to jpeg file.
- (1) Select [Edit] → [Optimize Image] → [Create PJ1 File], click or Click [Optimize] Button and select [Create PJ1 File] or [Create JPG File]

Optimize the Image size and convert into "PJ1" or "JPG" file. And then Save File dialog appears.

3.9 Save File

- (1) Select [File] \rightarrow [Save As] or click \blacksquare :
 - \rightarrow Save File dialog appears
- (2) Select the folder to save and enter the file name o, and then Click [Save].

 \rightarrow The file is converted to a transmittable form and saved in the folder, and the screen is closed.

3.10 Undo

This function will undo any previous change that you made. Click the \bowtie button or select [Edit] \rightarrow [Undo] to undo the previous change.

[NOTE]

This function will work until the three times that you change. It would not go back further.

CHkiSTIE[®]

3.11 Sending MyImage file

In order to display MyImage file on the projector, you need to send the file and store in the projector. The projector can store up to 4 images. Projector Image Tool only support sending a file to the single projector for verification purpose. If you need to deploy the MyImage file to multiple projectors, Please use Projector Management Software (PJMan).

<<< Following procedure may need to change. >>>

- (1) Select [Projector]-[Send], or click 🌌 :
 - \rightarrow "Confirm" dialog appears.

(2) Click [OK]

 \rightarrow It will display projectors that are founded by discovery function on the network

- When the connected projector is not found, please click the Find button. The projector is searched again.
- If the image file that you try to send is JPEG, projectors that do not correspond to JPEG will not be displayed.
